

## **Bridges cleans up Armistead Gardens during Project Clean Stream April 2, 2011**

On April 2, 50 Bridges students, parents, mentors, and volunteers braved 4 hours of cold and rain to participate in Project Cleanstream, a statewide effort to preserve the greater Chesapeake Bay Watershed. For the second straight year, Bridges worked on the wooded areas surrounding the Armistead Gardens community. Participants unearthed everything from old roofing and carpets, to plastic bottles, car tires, and an inflatable pool. Blue Water Baltimore coordinated the clean-up - one of the many sites they managed for Project Cleanstream.

Sixth grader Kamia, right, receives a pile of trash from a Bridges classmate.

The group gathers in Armistead Gardens for introductions before heading out to clean.

Sixth grader Gregory directs his classmate Tyreek towards a pile of trash.

One of the groups stops to unearth sheets of roofing tile.

The volunteers gather for a group shot at the end of a long but rewarding day.
