

Weekend Mentoring Visits the Maryland Science Center

February 4, 2012

On February 4, the Bridges eighth grade and their weekend mentors visited the Maryland Science Center in Downtown Baltimore. After a quick ice breaker, the group broke into teams of five for a scavenger hunt through the Science Center's exhibits. In addition to highlighting the major exhibits, the hunt provided an opportunity for team members to discuss and set goals for the month. Following the hunt, all enjoyed an IMAX "The Secret of Life on Earth".

Jamia and Ja'lah examine a recreated dinosaur egg in the Dinosaur Mysteries exhibit.

Everyone in the group shares a personal highlight from the last few months.

Mentor Phil and his student teammates compare their stress levels.

One team interviews a staff member at the Science Center for scavenger hunt answers.

Jamia sees what it is like to lay on a bed of nails.
